

**Table 2-5 - Summary of Alternatives for WDR Interim Action**

Alternative	Description
1—No Action	<ul style="list-style-type: none"><li>• No active cleanup would occur.</li><li>• No significant changes in PCB concentrations would occur, but some reduction of petroleum hydrocarbon concentrations is expected due to natural attenuation.</li><li>• Does not include monitoring.</li></ul>
2—Capping with Institutional Controls and Monitoring	<ul style="list-style-type: none"><li>• Includes capping of soil above CULs with clean fill.</li><li>• Includes institutional controls to restrict land use and control site access to preserve cap integrity.</li><li>• Includes compliance monitoring to evaluate cap integrity and effectiveness.</li></ul>
3—Excavation and Off-Site Disposal of Site Soils	<ul style="list-style-type: none"><li>• Includes excavation and off-site disposal of contaminated soil above CULs.</li><li>• Includes backfilling excavated areas with clean soil.</li><li>• Includes habitat restoration.</li></ul>
