

## **DETERMINATION OF NONSIGNIFICANCE**

### **Implementation of Interim Actions for Camp Bonneville, Washington**

#### **Description of proposal:**

The Proposed Action is to conduct specific interim actions as described in the Prospective Purchaser Consent Decree (PPCD), to be overseen by the Washington Department of Ecology pursuant to the Model Toxics Control Act, to enable the cleanup and ultimate reuse of the Property made available by the closure of Camp Bonneville. Specifically, the PPCD requires the implementation of interim actions related to the investigation and cleanup of the Property. Interim actions have been outlined for the purposes of completion of the SEPA Environmental Checklist.

The Property referenced in this Determination of Non-significance (DNS) is the 3,020 acres of Army-owned property and 820 acres of property the Army leases from the Washington Department of Natural Resources.

The Proposed Action is the implementation of interim actions to restrict access to the Property during investigation and cleanup activities (remedial actions) and reducing the threat to human health and safety associated with military munitions and other contamination. Brush and Munitions and Explosives of Concern (MEC) clearing activities similar to the interim actions have been ongoing within 10 feet of the interior of the Property perimeter and along the Central Impact Target Area (CITA) fence under an Emergency Action required by the PPCD. Interim actions involve the clearing of brush and surface clearance of Munitions and Explosives of Concern (MEC) within a 20-foot swath on each side of identified roads and trails at Camp Bonneville and in the small arms firing ranges for later removal of lead from these ranges

**Proponent:** Clark County Department of Public Works

#### **Location of proposal, including street address, if any:**

Camp Bonneville is located on the western slopes of the Cascade Mountains in the Lacamas Creek Valley in Clark County, Washington, approximately 15 miles northeast of Portland, Oregon, and approximately 10 miles east of Vancouver, Washington. The installation occupies approximately 3,840 acres in sections 34 and 35, Township 3 North, Range 3 East, and sections 1, 2, 3 and 10, Township 2 North, Range 3 East.

**Lead agency:** Washington State Department of Ecology

The lead agency for this proposal has determined that this proposal does not have a probable significant adverse impact on the environment. An environmental impact statement (EIS) is not required under RCW 43.21C.030 (2)(c). This decision was made after review of a completed environmental checklist and other information on file with the lead agency. This information is available to the public on request.

This DNS is issued under WAC 197-11-340(2); the lead agency will not act on this proposal for 14 days from the date below. Comments must be submitted by February 22, 2007.
