

**The Department of Ecology's Response to:  
Adar Feller – Streamkeepers of Clallam County (Comment 02)**

This assessment cycle is not a full reevaluation of past data as we did in 2002. The only assessment was performed on segments where new data was available. A full reassessment was not contemplated according to the 2006 policy. A future assessment will involve a total reassessment of all past and relevant data according to the policy in place at that time. The remarks and comments are therefore a mixture of new and old text. Contradictory and confusing statements have been edited as we become aware of them.

See response regarding bioassessment from Croxton letter.
