

The Department of Ecology's Response to:
Ken Johnson – Weyerhaeuser (Comment 21)

Per advice from David Rountry, the Department of Ecology TMDL lead for the Willapa River Dissolved Oxygen TMDL, Listing IDs 48939 and 48940 were determined to be impaired during TMDL processes and should be moved to category 4A as the TMDL will correct the impairment. Listing IDs 48939 and 48940 are new listings for the 2008 cycle. They had not been evaluated for pre-existing TMDLs and were wrongly placed into Category 5 instead of Category 4A.
