Conversation: New Category 5 marine dissolved oxygen listings
Subject: 51 - New Category 5 marine dissolved oxygen listings

There are numerous additional marine dissolved oxygen proposed category 5 listings. Ecology needs to apply the reasoning of the Grantham memo to these and make them either category 1 or 2. The new listings are 38463, 38547, 38806, 38847, 38698, 38819, 52999, 53000, 53002, 53001, 53007, 53008, 53009, 38840, 38939, 52994, 52995, 52996, 52997, 52998, and 53006. Many of these are near or surrounded by other category 1 stations for DO, such as stations 38820, 38836, 38761 and 38753.

Be careful also not to say that the Grantham memo supports a category 5 in cases where it did not, such as happened frequently in other DO proposed listings that I commented on earlier. Note also that 38820 (a category 1 for DO) is functionally the same location as 53006.
