Conversation: Industries required to sample for fecal coliform bacteria because of 303(d) listing

Subject: Industries required to sample for fecal coliform bacteria because of 303(d) listing

The first line of Section S6.C.4 should read:

"Permittees discharging to a 303(d)-listed water body for Fecal Coliform Bacteria."

Otherwise, it would appear that the section imposed fecal coliform bacteria monitoring on 6 different industrial categories regardless of a 303(d) listing.
