SUBMIT AS SOON AS POSSIBLE AND NO LATER THAN NOVEMBER 16, 2007  
(Forms may be submitted by FAX or sent via e-mail as an attachment.)

**The following is a NON-BINDING list of elements your project may include: (optional)**

- Stormwater source control for toxics in association with clean-up of contaminated sediment sites.
- Stormwater source control programs for shellfish protection districts where stormwater is a significant contributor.
- Conducting inventories of stormwater sources.
- Establishing and refining stormwater utilities (including stable rate structures, developing stormwater ordinances and regulations, initial staffing, and other capacity building activities for stormwater management.
- Review existing and model stormwater regulations.
- Mapping or geographic information systems of stormwater sources.
- Source controls such as erosion control projects involving plantings, drain stenciling, inspections, and public information and communication.
- Identification and removal of illicit stormwater discharges into municipal separate storm sewer systems.
- Completing detailed plans, for example, general stormwater management plans, engineering reports or facilities plans (including financing options and choices).
- Other activities consistent with Legislative provisos for this program, which can be completed within the June 30, 2009, timeline. (Please list these activities).
