Subject: Lagoon liners proposal
Date: Thursday, September 17, 2015 11:46:14 AM

I'm a dairy farmer in skagit county. I'm just getting word of this proposal being put together by DOE. If lagoons do indeed leak and that's a problem, then I think DEO should also include septic drain fields. As these systems are designed to leach into the groundwater. I would also like to see urban storm drain water also diverted from going directly into the waterways. Why stop with lagoons? There is so many other areas for potential regulation and control.

Thanks
