Attached is a letter with signatures regarding the Draft of Proposed CAFO rules from people in the Whatcom County Dairy industry.

September 30, 2015

TO: DIRECTOR OF ECOLOGY MAIA BELLON
FROM: WHATCOM COUNTY CITIZENS including FARMERS, LAND OWNERS,
and CONSUMERS

We **oppose** the current proposed CAFO permit rules developed by Washington State Department of Ecology.

These proposed CAFO rules would be a significant financial burden to farmers and land owners causing many to leave their businesses.

These rules do not strive for better results than already are in place under the current Dairy Nutrient Management Plan of zero runoff allowed.

This draft CAFO has many parts not based on fully proven, scientific evidence, including the three foot deep soil testing proposed.

We believe the dairy farming heritage in our community is worthy of more respect than shown by this CAFO proposal.

Please re-write the CAFO to better fit the needs of all.

With these organizations we stand in opposition of the draft CAFO permit:

Washington State Farm Bureau
Whatcom County Farm Bureau
Washington State Dairy Federation
Whatcom County Dairy Federation
Whatcom Family Farmers

Sincerely,

Current land owner
