Date: Thursday, March 01, 2012 1:58:36 PM

Ms Hammel:

Please accept this email as my official comment on the proposal to use the herbicide Imazamox in Puget Sound and Willapa Bay.

This is a very bad idea and results from a bizarre action by another state agency regarding Japanese eelgrass.

This chemical should not be allowed in our waters. The proposal to allow it would result in short-term profit for commercial shellfish producers at the expense of the long-term health of Willapa Bay and Puget Sound. Those who propose it should be ashamed of themselves.
