Subject: Aquatic Plant and Algae Management Permit Draft Comments
Date: Tuesday, October 05, 2010 4:08:58 PM

To Whom It May Concern:

Thank you for notifying us about the public comment period for the Draft of the permit. I have reviewed both the permit and fact sheet, and would like to offer the following feedback for consideration:

- I like the addition of the Summary of Permit Report Submittals.
- In the Summary, it states that the Pre-and Post-treatment Notification is due Prior to the first week of treatment, but the Notification, Inspection, and Posting Requirements (S5) seem to indicate that it is due by 8a the SAME week of the application. Which is correct?
- In the Special Permit Conditions (S1), the definition of what littoral zone limitations are seem a bit obtuse until one reads through to the end of the section AND the fact sheet. Maybe adding some additional verbiage toward the top of this section might help provide clarification?
- In section S2 – there are sections on how to apply for coverage, and how to terminate coverage, but not how to renew. It might be helpful to add that to this section for clarification. The only mentions I found about continuing coverage were when the permit or fact sheet talked about the DMP.
- The template for the DMP is great – it might be nice to mention that the template is available in the permit in the sections that reference it. If I hadn't gotten the permit from the website, I might not have known it existed.
- Shoreline Posting – Thank you for adding the option to combine signs. This helps significantly! However, when posting on docks, it still seems redundant, as what we have typically done is put one on the dock facing the shore, and one facing the water to adhere to this requirement. Would it be possible to change this when posting on docks? Or, changing the verbiage to something like "signs must be placed in such a manner that they will be visible from BOTH the shore and the water," etc.?

Thank you again, and thank you for all of the changes and updates. Most of what I would have suggested was already included!

Sincerely,

Dawn Petek
