Subject: Badger lake

I fish different lakes in the area. There are plenty of shallow lakes in the area for bass fishing. Even though bass are not a native fish. However, since Badger stays so cold, it only makes sense to keep it natural by stocking it with Trout. Badger has always produced great trout. It seems like bass fishing gets whatever they want. When I was stationed down south I lived bass fishing. Like I opened with, there is plenty of lakes in the area that have been had bass illegally planted. We need a trout lake. Thank you. Martin Steele.
