WATER QUALITY PROGRAM

3/5/10

Dear Mr. Jennings:

In years past I have called our mosquito control district with concerns about adult mosquitoes. They have helped me out by fogging in my neighborhood. I am concerned that The Mosquito Control Permit that is currently being considered will prevent the district from quickly responding to these problems.

I know the district spends a lot of time and money on larva control and I'm sure this helps, but they never seem to get them all. Mosquito control programs must be allowed to control adult mosquitoes as well. I am asking you to reword the permit so that we can continue to have adult mosquito control when needed.

We expect our mosquito control district to respond when we call with a mosquito problem. We pay for this service with tax dollars because we want to enjoy the outdoors during the summer months. Don't write rules that will prevent our district from fogging when we have so many mosquitoes that we need to call for their help.

Sincerely,

Joel Buckner
143 Willow Pt. Loop, Longview, WA 98632

Our vet reported to us in 2008 that our dog acquired worms from Longview mosquito activity. This was an adult dog who never had worms before moving to Longview. Treatment was very expensive for us since we are both on fixed income.

P.S.

There are 57 units housing 50+ over the age of 55 and many of us bear the scars of 2009 mosquito bites. We are surrounded on 3 sides by water. This is not only a public health issue but property values in Longview will be affected negatively.
