WATER QUALITY PROGRAM

Dear Mr. Jennings:

In years past I have called our mosquito control district with concerns about adult mosquitoes. They have helped me out by fogging in my neighborhood. I am concerned that The Mosquito Control Permit that is currently being considered will prevent the district from quickly responding to these problems.

I know the district spends a lot of time and money on larva control and I'm sure this helps, but they never seem to get them all. Mosquito control programs must be allowed to control adult mosquitoes as well. I am asking you to reword the permit so that we can continue to have adult mosquito control when needed.

We expect our mosquito control district to respond when we call with a mosquito problem. We pay for this service with tax dollars because we want to enjoy the outdoors during the summer months. Don't write rules that will prevent our district from fogging when we have so many mosquitoes that we need to call for their help.

Sincerely,

*Jo Dasso*

*P.S.: I have stock on my property and also  
fear west Nile for them and myself.*

*I asked to have areas sprayed last year as the  
mosquito's were so bad I couldn't go outside at dusk.  
I do my part by eliminating breeding areas on my farm,  
I would also like to have adults sprayed as well as  
larva.*
