Comments:

First, I'd like to express my disappointment in being turned away from the meeting in Moses Lake only to find out that you moved it outdoors.

It's hard to comprehend how this idea of not spraying for adult mosquitoes could be put forward without any scientific data or fact finding as to whether the spray is of any consequence at all to the water here or to humans. Spraying repellent on myself is more of a health hazard!

I'm sure you heard at the meeting how this decision will impact most of Eastern Washington. Where lots of lakes near by can be treated for larvae, places like golf courses and farmers who irrigate will have standing water where adult Mosquitos will ~~harras~~ harras humans & animals alike. Evening on my deck will be pure hell!

I applaud most of the work your dept does but this idea of not spraying for adults is just boneheaded!
