To whom it may concern,

I have an issue with this permit you're passing, we need fogging! My name is Desiree Vaughn and I live in an area completely surrounded by water, mosquitoes carry a wide variety of diseases and I wouldn't want to contract any of them. Our town has been controlling our overload in mosquitoes by fogging for 49 years and it hasn't harmed anyone yet, so I think it's safe to say fogging shouldn't be banned. If you think that banning this useful procedure is saving animals' lives, well what about all the people, imagine what could happen to our nation if all the mosquitoes with West Nile and yellow fever aren't killed, it will be the people you're worried about then. If this permit does go through then I think about all the people's lives at stake, and you will too when it gets too bad, you might even have to consider changing this permit again just to make fogging legal, which would make this a complete waste of your time.

Respectfully submitted,

Desiree Vaughn
