To whom it may concern,

I live in the small town of Burbank WA. We are surrounded by water and if Mosquito Control stop spraying here it would get worse then it is when they spray and that is pretty bad, so if you pass this permit it could hurt this little town and the Tri-Cities.

If you pass this permit then I feel like this could be a major thing to where people in our community won't be outside at all. If that happened I don't think this would be a good this because of all of the outdoor jobs in the tri-city area.

If we don't keep spraying the rate of the West Nile Virus outbreak will increase in high rates. I hope you take my thoughts into consideration and not pass this permit, I do not agree with this action.

Respectfully submitted,

Sydnee Rowland
