To whom it may concern,

Hello, my name is Jesse Shandy I have lived in the town of Burbank and attended Burbank school ever since I was a young child. I have been notified that the Mosquito Control is considering not spraying the concoction that kills Mosquitoes until there have been a number of cases such as West Nile Virus and Encephalitis in the area. Of this decision I do not support the idea of the permit and would like to voice my opinion on this case. To my knowledge there have already been cases of West Nile in the community of Burbank Washington and I believe that these cases can be reduced by spraying the Mosquito control Spray. If the Mosquito control does discontinue the more cases of West Nile will become a reality in the area and the community would not like this. I Jesse Shandy support the Mosquito control district and believe excess Mosquitoes will impact our health, quality of life, use of parks, recreation, and an economic impact on our community. So thanks for letting my opinion be heard and don't let the West Nile take hold of our community.

Respectfully submitted,

  
Jesse Shandy
