To whom it may concern:

I highly support the mosquito controlled districts. It is very important that the vast population of mosquitoes are be controlled. Excessive mosquitoes will impact everyone's health greatly if this permit is passed the way it is written right now. My health will be greatly impacted, for it will endanger me in a way that I may never recover completely. All of those mosquito borne diseases are hard to recover from and can cause brain damage and even death. During the summer I enjoy going to parks with my family. With this permit passed it will be hard for us to cook food if we have to keep swatting at the mosquitoes that are attracted to our blood and food. I also live right next to a river and have two dogs. Those mosquitoes will also endanger both my dogs' health just because the permit doesn't allow adulticiding, only until after the season. I take this personal because in a way this could be animal cruelty just because we know that we can stop the problem.

Respectfully submitted,

Ramses Valdovinos
