To whom it may concern:

Hello, my name is Jordin Wolf and I attend Columbia High School in Burbank, Washington. I have received information that your organization is planning on putting a stop to the nuisance adulticiding, as well as vector adulticiding. I believe this would be a major mistake because both of these forms of mosquito control need to be performed in order to keep mosquito-carried diseases out of the community.

As a resident of a dominantly rural area that is surrounded by all kinds of bodies of water, I completely support the acts of mosquito control districts. Without mosquito control, it would ruin my summer nights of camping, going on walks, or sitting around a bon-fire because the mosquitoes would be too over-bearing. Another reason why I support mosquito control is they decrease the chance of people and animals in my community receiving the West-Nile disease. Before you try passing this new permit, please consider how many lives it will effect. Mosquito control, as is, is completely necessary.

Thank-You,

Jordin Wolf
