MAR 16 2010
WATER QUALITY PROGRAM

Dear Mr. Jennings,

I support the Mosquito Control Districts because I believe that we should be able to spray for mosquitoes so that us and our families can enjoy the outdoors this coming spring and summer nights without having to worry about contracting West Nile Virus or any other disease.

The Mosquitoes were still an issue even when they were spraying, I couldn't imagine how bad it would be without spraying. I want to be able to enjoy the nice warm nights of the summer without worrying about having to put on stinky, sticky mosquito repellent to avoid bites or diseases.

This will not be good economically if there is no spraying. Companies like Boise Cascade and Tidewater are near the Columbia and Snake rivers and it would be nearly impossible to work with mosquitoes swarming around. People also wouldn't be able to camp or swim at Hood Park any more for the fear of getting West Nile.

So all in all I just want you guys to know spraying in Burbank Washington is critical and needs to be done. I hope you will let us continue spraying so everyone will be able to enjoy their warm spring and summer nights.

Respectfully Submitted,

Olivia Rowland
