To Whom It May Concern:

We live at 477 Edith St. in Burbank, WA. We live on a peninsula over 3/4 surrounded by backwater slews from the Snake and Columbia Rivers. It is essential that we continue to have the mosquitos controlled in this area with the fogging. There is too much risk of West Nile and bird flu from mosquitos living in this area. There are many children that play outside that would be susceptible to these mosquitos if they were not controlled. This is a health issue that would effect not only us, but those outside of our area as well. Please continue to provide this vital service to our area so we are not relegated to a life indoors.

Sincerely,

Troy and Vicki Blake  
Burbank, WA
