Subject: Mosquito Spraying
Date: Tuesday, March 09, 2010 3:35:35 PM

This e-mail serves as my written comment against the approval of the subject draft permit, fact sheet and notice of intent.

I strongly believe that nuisance mosquitoes as well as disease carrying mosquitoes must also be sprayed to be controlled in Benton County to ensure individual health and wellness. Benefits from this spraying far outweigh the unsubstantiated harm that may be caused by insecticide entering the water sources.

To this end I request that comment period on the draft permit be extended and a public hearing in the Tri-Cities be held to give our local representatives a chance to respond.

Thank you
