Subject: Spray for Mosquitos
Date: Monday, March 08, 2010 8:06:58 AM

Have you guys lost your mind. With West Nile and other issues that have very serious human effects, why are you not spraying for mosquito's. The laws and tests clearly indicate that spraying is allowed and and is not a serious threat. I think it is time that government and government employees start listening to the people that pay their salary instead of listening to environmentalists that make up things to gain political power.
