To: Department of Ecology

I live in the Prosser City Limits within 75 feet of the Yakima River. The mosquitoes are already out, and last year they were out during mid day in full heat. We must have an IPM adult spray program available! Prosser will lose tourism, and we already have a county reputation for West Nile. At my residence we currently fight nuisance mosquitoes, that attack even with repellent spray. My five and twelve year old children deserve to enjoy their backyard this summer!

Please alter the permit to say "The Permittee is authorized to discharge incidental amounts of adulticides and their residues to waters of the state for nuisance and vector mosquito control."
