FROM; George M Glaesemann 104 McNary Ridge Road ,Burbank,Washington 99323 e'mail budglaesemann@yahoo.com Gentlemen; I live on the outskirts of Burbank,Wa above A Federal Game Reserve that has several acres of water and breeds mosquitoes by the thousands. It would be impossible for my wife and me to go outside in the evening if the County Mosquito Control did not adulticide [fogging] for and kill adult mosquitoes in the surrounding areas and homes. I do not see what this new permit would do to benefit me or my neighbors or people who have horses and not to mention WEST NILE Disease. There as been several WEST NILE reported in Horses and Humans in the last year. So please do your part in keep the Permit proses as that in which Mosquito Control Districts can keep on adulticiding fro years to come. Thank You George M Glaesemann
