Our Columbia Misquito Control District has been doing a necessary and commendable job of controlling the misquito population in our area. Please allow them to continue the important work they are doing. Don't separate nuisance and vector misquitos, control both. Eliminate the use of the term " waters of the state." Change the language to allow organized districts under chapter 17.28 RWC to aduicide to control vector and nuisance mosquitoes. Eliminate Malathion and Nalid restrictions. Sincerely, LaRae Glessner
