Subject: Mosquito Control Permit Comments
Date: Monday, March 08, 2010 10:53:11 AM

We are citizens of Cowlitz County.

Though there is a big push by our county control district to continue spraying for mosquitos, we wish to advise you that we support the Department of Ecology's restriction on spraying. We believe that spraying of insecticides of any kind adversely affect wildlife diversity, and compromise our state's waters and thus adversely affects human health. We support a long range plan that reduces the use of pesticides of any kind in our ecosystems.

Thank you for a chance to comment.

Best regards,

Margaret and John Green
