Dear Jonathan-

We live at 10508 W. Court St. in Pasco. Each year the mosquito problem seems to grow worse and with all of the talk of West Nile Virus the situation grows more concerning.

Please do what you can to ensure the mosquito population is eradicated along the Columbia river corridor. I understand there are some concerns about spraying along a water way, but at some point human safety should be considered.

Thank you,

Dallas & Heidi Green
