---

Dear Jonathan,

Please continue to spray to prevent infestations. Last year my family and I could not even go into our backyard without being bitten 20+ times. I requested spray service and promptly a spray truck showed up and life in our backyard resumed to normal. I really do not want to restrict my family from going outdoors because of a "wording" issue. Please do whatever is necessary so that we can still have the same (preventative) services we gratefully pay for now. Having only a reactive spray system is not the answer.

Sincerely,

Sally J Hennessey
