I am a resident in the Columbia Mosquito control District. I am very concerned about the new permit attempt on the Mosquito Control districts in Wash State.

1. Please do not separate nuisance and vector mosquitos, both need to be controlled.
2. Eliminate the use of the term "waters of the state".
3. Change the current language to allow organized mosquito control districts under chapter 17.28 RCW to adulticide to control vector and nuisance mosquitos as listed in the districts Integrated Pest Management Plan.
4. Eliminate Malathion and Nalid restrictions from the permit.
5. As a voting citizen I support our mosquito control district and fear for the health & safety of life that will be affected by excessive mosquitos.
