From: Barbara Main
1008 Laguna Drive
Moses Lake, Washington 98837

Dear Sirs:

Please, please do not limit our Mosquito Board's pesticide spraying schedules.

We, who live in/on Moses Lake have enjoyed our outdoor activities without being attacked by mosquitoes.

We will always have some mosquitoes but nothing like it will be if you limit spraying for these "nasty" insects.

Some people are allergic to mosquito bites, causing great distress not to mention the fact that people can die from these disease carriers.

Moses Lake has enjoyed our many summer visitors who flock here to enjoy our Lake activities, along with our Aquatic Center. If we are invaded by mosquitoes, our visitors will think twice before they come back here.

These insects also affect our farm animals. Grant County Fairgrounds is located here in Moses Lake. With our hot summer weather and all the surrounding water, we definitely need the current Mosquitoe Board's spray program.

Please reconsider your latest mosquitoe spray policies so we can enjoy our great City to the utmost.

Sincerely,

A handwritten signature in cursive script that reads "Barbara Main". The signature is written in black ink and is positioned below the word "Sincerely,".
