Subject: Mosquito Control Permit
Date: Monday, March 08, 2010 12:34:44 PM

I urge you to alter the permit to allow the discharge of incidental amounts of adulticides and residues to the state waters for nuisance and vector mosquito control.

I am a resident within a few hundred feet of the Yakima River. Hordes of mosquitoes cover our neighborhood if the adults are not sprayed. West Nile Virus has been found in mosquitoes and local cases have been diagnosed in humans in the Yakima River area of Benton County. Our local health department recognizes the danger from mosquitoes carrying this virus.

I appreciate the efforts to protect the waterways, but believe that human health protection from West Nile virus should take precedence.

Barbara L. McIntyre
