Dear Mr. Jennings,

I am very concerned that our quality of life for outdoor activities will be significantly limited due to a mosquito infestation in the Tri Cities.

The Nile Virus is a very real concern as indicated by the growing number of confirmed cases in this area.

Last year in late Spring during early mornings and evenings they were unbearable. I believe there will be a public outcry if this affects thousands of people. Please pass this word along to the person who made this decision.

Thank You
Mike Minelli
