I am writing to voice my concern about the new rules being proposed by the Washington State Department of Ecology regarding Mosquito Control service in the Benton City area near the Yakima River. As written, it would be detrimental to the control of nuisance mosquitoes which would increase the risk of diseases carried by mosquitoes, namely the West Nile Virus. I urge you to alter the wording for the NPDES Permit to read "The Permittee is authorized to discharge incidental amounts of adulticides and their residues to waters of the state for nuisance and vector mosquito control."
