---

We have the following comment regarding the draft permit:

Special Permit Condition S5, Paragraph A regarding nuisance mosquito control - Similar to vector control, change the paragraph to read "The Permittee is authorized to discharge incidental amounts of adulticides and their residues to waters of the state for nuisance mosquito control." The existing paragraph in effect prohibits any spraying for nuisance control because mosquitoes breed and live near water. That is not acceptable. Our family lives in an area where mosquitoes are a major problem in the summer. After sunset, they swarm and attack anything that moves. Our children are severely allergic to mosquito bites. Without periodic spraying, they would be prisoners in their own home. This is also true for all the children in our neighborhood.
