---

Dear Mr. Jennings: I have lived in Kelso Washington for over twenty years, and have called the mosquito control district a number of time for the horrid mosquito problem in my area. They have always responded in short order and seem to take care of the problem. I am concerned that The Mosquito Control Permit that is currently being considered will prevent them from doing the job that we as taxpayers are paying for. The area where I live, (and alot of other semi rural people), has alot of small areas of standing water where the adult mosquitos seem to congregate around. In the spring and summer months they can drive you insane, let alone you cant go outside in the evening without being eaten alive! Please reword the permit so that the Mosquito Control District can do there job and keep spraying for the adult mosquitos! We spend alot of money in taxes for this service so that we can enjoy the outdoors without the health hazard and general nuisance of mosquitos. Please help us out by allowing them to keep spraying. Thanks for your help. Craig Norris 120 Lowrane Dr Kelso WA
