Subject: YES to spraying nuisance mosquitoes

Please send an email to the addresses below and voice your opinion. The "state" is worried about the spray getting into the waters. According to the mosquito control it is such a small amount used it does not make any difference. You can call or email the address below for Angela and get the facts.

YES TO SPRAYING NUISANCE MOSQUITOS

re: Nuisance Mosquito Control

Adulticides and their residues used for nuisance mosquito control must not be discharged to waters of the state.

My Comment:

The nuisance mosquitos in this area are extreme. I have seen other places that do not spray and the people are unable to get out and enjoy their yard. If we did not have the right to have these nuisance mosquitos sprayed most of us would have to stay inside much of the time. Please do not take away the pleasure enjoyed in Southeast Washington! I, personally, feel the waters in this area are not impacted from the spray enough to prevent the mosquito control to take place.

Thank you,
Robin Quinton
