---

I understand there is going to be some possible changes to the mosquito control rules in our area, Walla Walla County.

Our past experience has been that they fog our area at least twice a year and we feel that along with our own control of standing water and other methods that the control of the mosquitos has worked.

We appreciate the work they do hope that you reconsider the changes that would effect residential fogging and other controls.

Thank you for your attention to this matter.

Charlotte and Don Rakestraw
