Subject: Permit
Date: Tuesday, March 09, 2010 7:37:58 PM

For the safety of all living beings the permit must include the spraying of adult mosquitos!

The city of Moses Lake and other surrounding cities are promoting tourism. If people come to the area and are bitten alive by mosquitoes they will not return. This will hurt the state in revenue!

If the people who live here are not able to enjoy the out doors with out getting bitten by mosquitoes they will be very upset!

There must be some insecticides that can be used to destroy adult mosquitoes and larva that will not be toxic to aquatic organisms.
