Subject: Mosquito Spraying in Washington
Date: Wednesday, March 17, 2010 8:48:28 AM

Hello,

I live in Burbank close to the river, and in the summer time my kids and I already get bitten quite often by mosquitoes....and they currently spray.

If they quit spraying, it will be impossible to do anything outside in the early evening.

Please do everything possible to continue spraying near the water.

Chris Soden
