Subject: "Mosquito Control Permit Comment"
Date: Tuesday, March 16, 2010 12:21:30 PM

Why don't you just leave things alone when its working. I have not heard of any problems with fogging. In our district, they do not fog over the water.

Within the past 10 years we went through this NPDES permit thing. Its been working. Mosquitoes look alike. You don't know which one has a disease. They all bother you. You can call them a nuisance if you want. Like the neighbors dog running loose using your yard to do his duty. You go out to enjoy your yard and step in it, do you say " OH, ITS JUST A NUISANCE"? I DOUBT IT.

If you stop the fogging for adult mosquitoes you will see more problems arise. Everyone will be out buying whatever they can to control mosquitoes. They are not trained about usage and the products will not be like our mosquito control district uses. Also it takes only one adult to carry and spread the VIRUS!

Let us enjoy our yards without "stepping in it". I am tired of hearing of the poor fish. Why the seals eat more fish at Bonneville Dam then fogging will ever harm. Lets for once talk about the "QUALITY of LIFE" for HUMANS!
