Subject: Pesticides in Willapa Bay
Date: Sunday, November 30, 2014 12:48:41 PM

Dear Mr. Rockett,

I am concerned about unmonitored potentially detrimental use of imidacloprid to in oyster beds in Willapa Bay. This chemical can drift into other areas and may be harmful to human health. The oyster industry is a valuable resource but using dangerous chemicals to control pests needs careful consideration.
