---

Sir,

I wish to comment on the spraying of chemicals in Willapa Bay. I am against it. The bay is so pristine! We stopped eating oyster from anywhere else other than this bay because we know how clean it is compared to other areas. Please find a way to avoid using chemicals in the bay. As you know, oysters bio accumulate chemicals, metals, etc. This is why we never eat oysters from China or the Gulf Coast. Let's not turn Willapa Bay into another toxic area!

Thank you,  
Michael Williams
