Subject: Attention Derek Rockett: No neonicotinoid product use please
Date: Tuesday, February 11, 2014 8:56:08 AM

Good morning Mr. Rockett,

I was given your contact information via our WA state Bee Keeper's Ass. president at the monthly meeting of the Olympia Bee Keeper's Association. I am a honey bee keeper and active member.

I strongly urge you to consult Thurston County's use of chemical management of roadways vegetation and follow accordingly.

Neonicotinoid products applied to plants are then translocated throughout the plant material. These pesticides are becoming increasingly controversial due to the growing evidence that they harm bees and other pollinators. Most recently, they have been linked to multiple bee kills in Oregon.

Thank you,

Lisa Wahl
