

Section #	Subsection	Sec Title	Rule Version	Who	Type	Comment
173-219-580	(4), (5), (6), (7)& (8)	Land Application - Agricultural Irrigation		Ann Wick WSDA		Why is there a difference in the set back for Processed Food Crops and Nonfood Crops? It appears the intent is to protect the public, not the crop so the distances should be the same. Same comment for frost protection of orchard crops and pastures.
173-219-580		-9 Land Application - Agricultural Irrigation		Ann Wick WSDA		There is some concern that using the term "standard manuals of practice" is open ended. I presume this will be addressed in the Guidance material.

Suggested revisions

Since the reclaimed water must meet standards, I would suggest that the set back be 50 feet for all instances.
