

King County Comment 12-30-2009 Reclaimed Water Draft Rule

Tim and Jim, please include this as another comment in the draft rules. Thanks Sue

***Part IV ADEQUATE AND RELIABLE TREATMENT***

**WAC 173-219- 320 Class A reclaimed water treatment and monitoring**

**Comment: It is not clear from the draft rule what frequency you want for virus sampling- if you are proposing certification sampling only and/ or periodic sampling. We would support certification sampling and periodic sampling but not ongoing frequent sampling. If you are proposing on going virus sampling on a very frequent basis, which seems to be beyond what your reference materials describe ( unless we are mis reading it), we need to know what frequency you are proposing. Thanks Sue**
