

Washington Department of Ecology
 Reclaimed Water Use Rule
 Technical Advisory Panel Work Session
 Thursday, June 26, 2008
 9:00 a.m. – 3:30 p.m.

Pre- Meeting Homework:

- **Review information** - May meeting notes, strawdog outlines on Sharepoint site.
- **Think** about the question of the day and how best to answer it.
- **Bring** written ideas - suggest you bring your laptop to the work session.
- **Prepare to produce** a product by end of day.
- Note we plan to split into small workgroups of 3-4 persons.

Two questions for the Day:

1. **What technical standards should we adopt for *Groundwater Recharge* in the 2010 rule and how will compliance be measured?**
2. **What technical standards should we adopt for *Urban Non-irrigation Use* in the 2010 rule and how will compliance be measured?**

Goals of the Day:

- a. **Review and finalize recommendations for pathogen removal/inactivation.**
- b. **Review and finalize recommendations for irrigation uses – agricultural and urban.**
- c. **Complete preliminary recommendations for groundwater recharge uses**
- d. **Complete preliminary recommendations for urban non-irrigation uses**

Time	Topic	Outcome
9:00 – 9:10	Welcome and introductions Reminder that recommendations due by October 2008.	Reinforce workplan time frame
9:10 – 10:15	Task #1: Review recommendations from RAC for pathogen reduction standards	Incorporate new information into decision making process
10:15 – 11:00 with break	Task #2: Divide into same small groups as last mtg. and each group finalize their proposal for the conceptual rule.	Final recommendations to RAC for pathogen removal & irrigation
11:00-11:45	Task #3: Small groups present their proposals	
11:45 – 1:45 includes lunch break	Task #4: Divide into two (or three) small groups and each group answer a question for the day. Develop proposal for conceptual rule.	Small group proposals for conceptual rule.
1:45 -2:30	Task #5. Small group presentations on proposal for conceptual rule.	Presentations
2:30 – 3:00	Task #6 Agreement on recommended approach.	Preliminary recommendations
3:00– 3:30	Task #7. Develop question and tasks for July meeting. <ul style="list-style-type: none"> • What technical standards in rule for wetlands/streamflow augmentation and other water quality concerns not yet addressed? • What should we consider in answering this question? • What else should we do to prepare for the meeting? • Audience comments if any. 	Agreement on July meeting. <ul style="list-style-type: none"> • Question. • Factors to consider. • Homework.
