Subject: EATING FISH
Date: Monday, March 23, 2015 5:10:30 PM

Hello all you folks in the ecology department,

Please protect people's health and water quality, by acknowledging how much fish people eat (175 g/day) and then the cancer risk at 1 in 1 million, instead of making it less protective, increasing the risk to 1 in 100,000!

Thank you,
Ronna Loerch
