Hello

We want clean water. My family eats shellfish and fin fish from Washington state waters. Business has already polluted too much of our waters. We live on Budd inlet in Olympia and can't eat any shellfish off our beach because of Cascade pole and the idea that profit and industry are more important than the planet on which we live. This is it people. We don't have anywhere else to go. And I would like there to be food for my children. Or at least for the other animals and organisms that are left here.

Do the right thing. We have bowed down to industry long enough.
